

March 26, 2020

With the daily changes surrounding the COVID-19 virus, we would like to provide an update for our customers regarding the operation status of our company.

American Products, LLC serves the Telecommunications, Energy and Transportation Industries and meets the requirements of the Essential Business qualifications. Therefore, our facility will stay open to manufacture these critical products to support our customers and our country.

We are taking proper precautions to protect our employee's health and are closely monitoring the COVID-19 virus changing environment on a daily basis.

We continue to work closely with our supply chain partners to ensure supplies and products flow to our factory so we can meet our commitments. So far, we have not experienced any issues that could not be solved quickly. Our trucking lanes remain open and truck availability is excellent.

Customer orders are shipping on-time without any delays and, as far as we can see in the near future, we do not anticipate that to change.

We will communicate to all of our customers if anything changes. Rest assured we are doing all we can to remain in operation to serve our customers that depend on us to help supply the essential needs of our country.

Thank You,

Steve Smith
President / CEO
